

Cells start as *Code* cells, but we often want to enter Mar  
*Markdown* cell back to a *Code* cell. There are three easy  
\* As seen below, you can use the drop-down menu at the top  
*Code*, *Markdown*, or *Raw*

\* If you are in command mode, you can use a keyboard shortc  
The standard keyboard shortcuts are ```m``` for Markdown an  
\* If you are not in command mode, you can still use a keybo  
```ctrl-m``` first, and then press either ```m``` for *Mark*
